

Winlink Frequencies

For when you don't have an Internet connection.

Instructions: Determine the correct HF band for the time of day. Manually copy the call sign and **centre frequency** into the Winlink program when you open VARA, ARDOP or PACTOR. This will automatically put the radio on the correct dial frequency. You might need to try different locations for that band.

80 m Band

Callsign	Location	Centre	Dial	Distance km	Bearing	Grid Square	QRZ.com
